Joint venture photovoltaic module projects

Overview

When is Vikram Solar launching a JV in the US?

Vikram Solar's JV in the US will come in two phases, starting with a 2GW module assembly plant in 2024. Image: Vikram Solar.

What is PV moduletech USA?

PV ModuleTech USA, on 21-22 May 2024, will be our third PV ModuleTech conference dedicated to the U.S. utility scale solar sector. The event will gather the key stakeholders from solar developers, solar asset owners and investors, PV manufacturing, policy-making and all interested downstream channels and third-party entities.

How can a joint venture plan a portfolio of projects?

If the joint venture plans a portfolio of projects, one project company could be purchased while the others stay under the joint venture. Here again, it is a good idea to attach a form of membership interest purchase agreement, purchase and sale agreement or build-own-transfer agreement to the joint venture agreement as an exhibit.

What is PV moduletech Europe 2024?

PV ModuleTech Europe 2024 is a two-day conference that tackles these challenges directly, with an agenda that addresses all aspects of module supplier selection; product availability, technology offerings, traceability of supply-chain, factory auditing, module testing and reliability, and company bankability.

Will PV Manufacturing be a success in 2024?

The event in 2023 was a sell out success and 2024 will once again gather the key stakeholders from PV manufacturing, equipment/materials, policy-making and strategy, capital equipment investment and all interested downstream channels and third-party entities. The goal is simple: to map out PV

manufacturing in the U.S. out to 2030 and beyond.

Do I need a joint venture Contribution Agreement?

If whole projects are being contributed by one of the parties to the joint venture, then a separate contribution agreement may be needed in order to address project-related representations and warranties and associated indemnities to be given by the party contributing the projects.

Joint venture photovoltaic module projects

Prime Infra plans to build a 3.5GW/4.5GWh large-scale battery ...
