

## SolarMax Energy Systems

# Kazakhstan Photovoltaic New Energy Storage Equipment

## Overview

---

Is Kazakhstan a good place to invest in solar power?

Kazakhstan has remarkable solar potential with a very well-designed auction system, a clear renewable capacity addition schedule, and a solid decarbonisation target. The country is now also including storage systems as part of its public procurement strategy in a move that will ease further integration of renewables into the grid.

Where is Kazakhstan's new solar power plant located?

A few months later, the EBRD loaned another \$42.5 million toward a \$75 million 63 MW solar photovoltaic power plant that Risen is building in Chulakkurgan, north of Shymkent. China, which now produces 70 percent of the world's solar panels, is well represented in Kazakhstan's new renewable projects, but it is not the only player.

Can solar power drive Kazakhstan's decarbonisation?

The focus now is on leveraging solar's comparative advantages to drive forward Kazakhstan's decarbonisation and harness its significant solar resources. This report builds on the first edition of solar investment opportunities in Kazakhstan.

What's new in Kazakhstan?

This update contains the latest economic and political advancements in the country, including the announcement of Kazakhstan's new decarbonisation target for 2060, and the recent Memorandum of Understanding signed between the EU and Kazakhstan, stepping up cooperation on renewables, green hydrogen, and battery value chains.
