

SolarMax Energy Systems

Kazakhstan has a photovoltaic site

Overview

Kazakhstan has areas with high that could be suitable for , particularly in the south of the country, receiving between 2200 and 3000h of sunlight per year, which equals 1200-1700 kW/m² annually. Both concentrated and (PV) have potential. There is a 2 MW solar PV plant near Almaty and six solar PV plants are currently under construction.

The Kapshagay photovoltaic power station, one of the largest single solar power projects in the Central Asian country, is a part of the China-Kazakhstan green energy cooperation initiative, jointly invested in and constructed by the Chinese company Universal Energy and Kazakh counterparts.
