

Overview

Is Kiribati launching a solar PV project?

The Oceania located nation of Kiribati has started construction on the country's largest solar PV project that's backed by the Asian Development Bank and the Government of New Zealand. It will be accompanied by a battery energy storage system (BESS). The 7.5 MW South Tarawa Renewable Energy Project (STREP) is located on the Bonriki water reserve.

Does Kiribati have a solar power system?

Kiribati's outer islands are served largely with solar home systems, and Kiritimati island, the second largest load center (1.65 GWh in 2016), has a separate power system not managed by the PUB. 6. Constrained renewable energy development and lack of private sector participation.

How will Kiribati reduce fossil fuel consumption by 2025?

13 Kiribati committed to use renewable energy to reduce fossil fuel consumption by 2025 (23% reduction on South Tarawa, 40% on Kiritimati, and 40% on the outer islands). It has also set the target of using energy efficiency to further reduce diesel consumption by 2025 (22% on South Tarawa, 20% on Kiritimati, and 20% on the outer islands).

Who is behind the STREP project in Kiribati?

Pictured are ADB and local government representatives at the groundbreaking ceremony of the STREP project in Kiribati. How much power does Kiribati have?

The PUB serves more than 57,000 people in South Tarawa, which has the highest demand at 24.7 gigawatt-hours (GWh) in 2019. Kiribati's outer islands

are served largely with solar home systems, and Kiritimati island, the second largest load center (1.65 GWh in 2016), has a separate power system not managed by the PUB. 6.

What is Kiribati's energy consumption?

Primary energy demand. Kiribati's energy consumption, which is dominated by imported fossil fuels (52%) and coconut oil (42%), has been steadily increasing over the last few years. The residential sector is the largest consumer of energy, followed by land transport.
