

SolarMax Energy Systems

Korea Electric Power Storage Company

Overview

Are South Korean companies investing in energy storage systems?

Less than a decade ago, South Korean companies held over half of the global energy storage system (ESS) market with the rushed promise of helping secure a more sustainable energy future. However, a string of ESS-related fires and a lack of infrastructure had dampened investments in this market.

Will KEPCO build another 300 MW battery energy storage system?

The utility also plans to build another 300 MW battery energy storage system by 2028. Korea Electric Power Corp. (KEPCO) has completed construction of a large battery energy storage project in Miryang, Gyeongsangnam-do Province.

What happened to Korea's battery storage market?

ET News said it marked the utility's first bulk procurement of battery storage in five years since the Korean market was put on pause by a series of fires at mostly commercial and industrial (C&I) facilities during 2017-2018.
