

## SolarMax Energy Systems

# Kosovo wind power storage system price

## Overview

---

Walk-in energy storage container prices in Kosovo currently range from €300-€600/kWh. But wait - before you reach for your calculator, let's break down what actually determines these numbers: Does Kosovo have a wind farm?

In 2018 Kosovo commissioned its first major wind farm, the 32 MW Kitka plant, and in September 2021 part of the 105 MW Bajgora plant started test operations. Kosovo reached a 24.4 per cent share of energy from renewable sources in gross final energy consumption in 2020, slightly below its target of 25 per cent for 2020.

What is Kosovo's Energy Strategy?

The energy strategy foresees 170 MW in battery operating power. In addition, procedures are scheduled to be announced in the fourth quarter for a solar power plant of 100 MW for government-controlled power utility Kosovo Energy Corp. (KEK) and a solar thermal system for district heating in Prishtina, according to Rizvanolli.

How much will Kosovo's new solar power plant cost?

In addition, procedures are scheduled to be announced in the fourth quarter for a solar power plant of 100 MW for government-controlled power utility Kosovo Energy Corp. (KEK) and a solar thermal system for district heating in Prishtina, according to Rizvanolli. The contracts will have a combined value of EUR 180 million, she added.
