# Kyrgyzstan s new solar panels

## Overview

---

Where is Kyrgyzstan building a new solar power plant?

Kyrgyzstan has launched the construction of a new solar power plant in the Kemin district of the Chui region, approximately 100 kilometers east of the capital, Bishkek. The plant will have a capacity of 100 MW and is expected to generate 155 million kWh of electricity annually.

Why is China building a 100 MW solar power plant in Kyrgyzstan?

Kemin, Kyrgyzstan — In a significant step toward enhancing Kyrgyzstan's energy infrastructure, China has begun construction of a 100 MW solar power plant in the city of Kemin, located in the Chuy Region. The project underscores Kyrgyzstan's commitment to sustainable energy development and environmental preservation.

What is Kyrgyzstan's solar project?

The project underscores Kyrgyzstan's commitment to sustainable energy development and environmental preservation. The solar plant, once operational, is expected to generate 155 million kWh of electricity annually, contributing to the country's energy needs while reducing reliance on fossil fuels.

Does Kyrgyzstan have a high share of renewable electricity?

The calculated share mostly consists of hydroelectricity, but is likely underestimated as data on the consumption of fuelwood and other solid biofuels by households are currently not available. Around 90% of total electricity generation is hydro-based. Kyrgyzstan has one of the highest shares of renewable electricity in the world.

What are the key agreements between Kyrgyzstan and negk?

The project includes a number of key agreements such as a 25-year offtake contract with the National Electric Grid of Kyrgyzstan (NEGK), a public-private

partnership agreement with the Ministry of Energy, and a 25-year investment agreement with the Cabinet of Ministers.

Will EDB build a hydropower plant in Kyrgyzstan?

The power plant will fully comply with international environmental and technical standards,” said Denis Ilin, EDB Senior Managing Director. In the meantime, the lender is also participating in a project to build and operate the USD-127-million Kulanak hydropower plant in Kyrgyzstan. (USD 1.0 = EUR 0.923)
