

SolarMax Energy Systems

Latvia wind solar and energy storage project construction

Overview

Where is the first battery energy storage system in Latvia?

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region.

Does Latvia have an offshore wind farm?

Yes, Latvia has an offshore wind farm, as it is part of the joint project of the Latvian and Estonian offshore wind farm, which is included in the Latvian National Energy and Climate Plan for 2030.

How does wind energy work in Latvia?

Sun constantly creates an air flow in the atmosphere – wind – which captured can be used to produce electricity. Harnessing wind doesn't require any kind of extraction, transportation or combustion of any raw material. The source of wind energy is inexhaustible. And the good news is that wind is available in large quantities in Latvia. Eco friendly.

Is development of wind parks possible in Latvia?

Latvenergo.lv. Archived from the original on 9 September 2022. Retrieved 9 September 2022. ^ "Development of wind parks is possible in whole Latvia's territory - LVM". The Baltic Times. Archived from the original on 9 September 2022. Retrieved 9 September 2022. ^ "Prime Minister: investment in wind farms to reach one billion euros".

How will the elwind project affect Latvia's energy security?

The Elwind project in Latvia is expected to increase energy security and potentially decrease energy production costs in the future. Additionally, the energy produced will become greener.
