

SolarMax Energy Systems

Lead-acid battery energy storage container

Warranty
10 years

LiFePO₄

Intelligent BMS

Wide Temp:
-20°C to 55°C

Overview

The BTS Container is designed for used lead acid batteries to be collected from the “coal face”, the Used Battery Generators, and be delivered directly to the Battery Recycling Facilities, where the used batteries can be automatically unloaded.

UNISEG’s Battery Transport & Storage (BTS) Container was specifically designed for the safe, environmentally sustainable and efficient storage and transportation of used car.

The figure below shows UNISEG’s BTS Container in the front load configuration and its features that make it ideal as a spent car battery storage container and lead acid battery container; Note:.

The figure below shows UNISEG’s Battery Transport & Storage Container, closed and ready for the immediate, safe & secure transport of your spent or used car batteries and other lead acid batteries. For efficient reverse logistics, the BTS Container can be collapsed and stacked up to 4 units high.

The major benefits of the BTS Container for the storage and transportation of used lead acid batteries (ULAB), include; 1. Safe & Convenient Used Car Battery Storage The Battery Container’s front load configuration enables the ergonomic loading of heavy car batteries into the Battery Container. The 6.5 Gal bunded base captures and prevents.
