

SolarMax Energy Systems

Lesotho communication base station wind and solar hybrid latest

Overview

Will Lesotho be able to pilot a hybrid solar PV mini-grid?

Successful pilot hybrid solar PV mini-grid in Lesotho paves way for a further 10 mini-grids that will provide first-time energy access to 30,000 people and clean power to seven health clinics.

Is Lesotho launching a solar mini-grid project?

The second phase of a pioneering solar mini-grids project in Lesotho is underway following the completion of a pilot project funded by REPP in Ha Makebe village, north-east of Maseru.

Does Lesotho need electricity?

Electricity demand in Lesotho has surpassed the main domestic generation of 72-MW hydropower station with 59% capacity deficit currently met by imports from South Africa 1. Introduction.

What is Lesotho's new mini-grid?

The pilot mini-grid and those of the planned larger portfolio are solar PV hybrids with battery storage and limited LPG backup generation. The hybrid nature of the design is to ensure 24-hour, year-round electricity supply, including Lesotho's harsh winters.

Are EDM & Eskom contracts a good choice for Lesotho?

Both bilateral contracts from Eskom and EDM come with heavy reliability premiums and their annual reviews are subject to the volatile market conditions which can result in increased expense or an obstruction of the electricity supply to Lesotho [15].

What is a flat rate tariff in Lesotho?

The coefficients α_w , α_s , α_h and α_{imp} (\$/MWh) represent tariff or cost of

electricity that must be paid by LEC to the power producer and imports per 1 MWh of injected energy to the grid. This cost of electricity is assumed to be constant for each power producer, in Lesotho, and it is named a flat rate tariff.
