

SolarMax Energy Systems

Liquid Battery Site Cabinet

Overview

What is included in a battery management system?

In addition to battery cells, there are switch-disconnectors, contactors, sensors, sampling lines, battery management systems, as well as control units being integrated into the same battery rack. BESS employs a sophisticated, multilevel battery management system (BMS) for system monitoring and control. Each battery management system including:.

What are the technical specifications of hypercube liquid-cooling outdoor cabinet?

Technical Specifications Solutions Our Cases HyperCube Liquid-cooling Outdoor Cabinet Intrinsically Safe Smart and Efficient Flexible Deployment Easy Maintenance IP67-rated battery pack, pack-level fire protection, multi-layer fuse protection, multi-dimensional electrical detection.

How many temperature detectors does a battery module have?

Each battery module has 8 temperature detectors. There are 2 racks that fit in a single battery cabinet, 9 slots in each battery rack to accommodate 8 battery modules and total 1 BSPU (Battery Switch & Protective Unit). Racks are connected in parallel and paired with a system BMS to meet the power and energy requirements of the application at hand.

What is a battery rack?

Each battery rack contains a rack-level BMS. The positive (+) and negative (-) terminals of the battery modules are clearly marked and are designed for the convenience of connection, visual check, examine, and repair. The external casing is made of metal covered by insulating materials.

What is a battery module made of?

The external casing is made of metal covered by insulating materials. For example, the top cover is made of PP, the bottom base is made of aluminum.

The copper bars and screws are connected internally to prevent short circuit to ensure the electrical safety of the battery module. Each battery module has 8 temperature detectors.

How many battery cells are in a battery rack?

All wire connections are placed on the front side of the rack to allow easy installation and maintenance. Since each battery rack hosts 8 battery modules and each battery module has 52 battery cells, each battery Rack has a total of 416 battery cells connected in series.
