

## SolarMax Energy Systems

# Lithium battery cost for energy storage power stations

## Overview

---

Are battery energy storage systems worth the cost?

Battery Energy Storage Systems (BESS) are becoming essential in the shift towards renewable energy, providing solutions for grid stability, energy management, and power quality. However, understanding the costs associated with BESS is critical for anyone considering this technology, whether for a home, business, or utility scale.

What are battery cost projections for 4 hour lithium-ion systems?

Battery cost projections for 4-hour lithium-ion systems, with values normalized relative to 2022. The high, mid, and low cost projections developed in this work are shown as bolded lines. Figure ES-2.

Will lithium-ion battery price decrease through 2050?

The national laboratory is forecasting price decreases, most likely starting this year, through to 2050. Image: NREL. The US National Renewable Energy Laboratory (NREL) has updated its long-term lithium-ion battery energy storage system (BESS) costs through to 2050, with costs potentially halving over this decade.

Are lithium-ion batteries more expensive than solid-state batteries?

As mentioned, lithium-ion batteries are popular but more expensive. Newer technologies like solid-state batteries promise higher performance at potentially lower costs in the future, but they are still in the developmental stage. Government incentives, rebates, and tax credits can significantly reduce BESS costs.

Why is Bess so expensive compared to a lithium-ion battery?

A big driver of the fall in BESS costs will be a decline in the costs of the battery cells and packs themselves, which can make up half the cost of a lithium-ion BESS.

## Are lithium ion batteries expensive?

Lithium-ion batteries are the most popular due to their high energy density, efficiency, and long life cycle. However, they are also more expensive than other types. Prices have been falling, with lithium-ion costs dropping by about 85% in the last decade, but they still represent the largest single expense in a BESS.
