

## SolarMax Energy Systems

# Lithium battery power supply for communication base stations

## Overview

---

Which battery is best for telecom base station backup power?

Among various battery technologies, Lithium Iron Phosphate (LiFePO<sub>4</sub>) batteries stand out as the ideal choice for telecom base station backup power due to their high safety, long lifespan, and excellent thermal stability.

What is a telecom battery backup system?

A telecom battery backup system is a comprehensive portfolio of energy storage batteries used as backup power for base stations to ensure a reliable and stable power supply. As we are entering the 5G era and the energy consumption of 5G base stations has been substantially increasing, this system is playing a more significant role than ever before.

What makes a telecom battery pack compatible with a base station?

Compatibility and Installation Voltage Compatibility: 48V is the standard voltage for telecom base stations, so the battery pack's output voltage must align with base station equipment requirements. Modular Design: A modular structure simplifies installation, maintenance, and scalability.

Should telecommunication operators invest in a telecom battery backup system?

Investing in a telecom battery backup system is always one of the priorities for telecommunication operators in the 5G era. Sunwoda 48V telecom batteries have a capacity covering 50Ah-150Ah, which can easily meet the power backup needs of macro and micro base stations.

Why should you buy a lithium Network Power Battery?

Leoch manufactures a wide range of Lithium Network Power Batteries to cover any telecommunications requirement. Aiming to deliver an unprecedented value to your needs, these solutions offer exceptional performance, long life, high energy density, ease of installation, and hassle-free operation for a broad

spectrum of telecom applications.

How do you protect a telecom base station?

Backup power systems in telecom base stations often operate for extended periods, making thermal management critical. Key suggestions include:

Cooling System: Install fans or heat sinks inside the battery pack to ensure efficient heat dissipation.

## Home Energy Storage (Stackble system)

High Efficiency

Easy installation

Safe and Reliable

Perfect Compatibility

### Product Introduction

- ✓ Scalable from 10kWh to 50kWh
- ✓ Self-Consumption Optimization
- ✓ Integrated with inverter to avoid the compatibility problem

- ✓ LFP Battery: safest and long cycle life
- ✓ Stackable design: effortlessly installation
- ✓ Capable of High-Powered Emergency Backup and Off-Grid Function

## Base Station Batteries

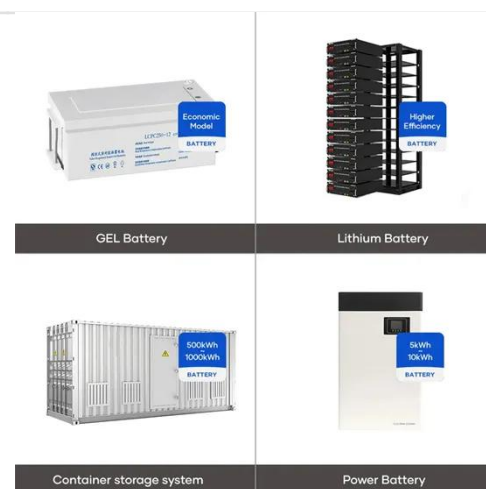

A telecommunication base station (TBS) depends on a reliable, stable power supply. For this reason, base stations are best served by lithium batteries that use newer technology - in ...
