

## SolarMax Energy Systems

# Lithium battery site cabinet cost in liquid-cooled energy storage

## Overview

---

Let's cut to the chase: battery energy storage cabinet costs in 2025 range from \$25,000 to \$200,000+ – but why the massive spread?

Whether you're powering a factory or stabilizing a solar farm, understanding these costs is like knowing the secret recipe to your grandma's famous pie. How much does commercial battery storage cost?

For large containerized systems (e.g., 100 kWh or more), the cost can drop to \$180 - \$300 per kWh. A standard 100 kWh system can cost between \$25,000 and \$50,000, depending on the components and complexity. What are the costs of commercial battery storage?

.

What is included in a battery cabinet?

Each battery cabinet includes an IP56 battery rack system, battery management system (BMS), fire suppression system (FSS), HVAC thermal management system and auxiliary distribution system. Outdoor liquid cooled and air cooled cabinets can be paired together utilizing a high voltage/current battery combiner box.

How long does a LiFePO4 battery last?

This liquid-cooled battery energy storage system utilizes CATL LiFePO4 long-life cells, with a cycle life of up to 18 years @ 70% DoD (Depth of Discharge). It effectively reduces energy costs in commercial and industrial applications while providing a reliable and stable power output over extended periods.

What is an all-in-one battery energy storage system?

This comprehensive system ensures the safety of both equipment and personnel at all times. All-in-one battery energy storage systems are pre-installed at the factory, significantly reducing on-site commissioning time. Upon arrival, the system can be easily integrated into the grid, allowing for

quick and seamless deployment.

How does a lithium iron phosphate (LiFePO<sub>4</sub>) battery pack work?

Battery Packs utilize 280Ah Lithium Iron Phosphate (LiFePO<sub>4</sub>) battery cells connected in series/parallel. Liquid cooling is integrated into each battery pack and cabinet using a 50% ethylene glycol water solution cooling system. Air cooling systems utilize a HVAC system to keep each cabinets operating temperature within optimal range.

Can a liquid cooled and air cooled cabinet be paired together?

Outdoor liquid cooled and air cooled cabinets can be paired together utilizing a high voltage/current battery combiner box. Outdoor cabinets are manufactured to be a install ready and cost effective part of the total on-grid, hybrid, off-grid commercial/industrial or utility scale battery energy storage system. BESS string setup examples are:
