

## SolarMax Energy Systems

# Lithium titanate as outdoor power supply

## Overview

---

What is lithium titanate battery?

Lithium titanate battery is the new type of lithium ion battery with ultra-safety, ultra-high rate and extremely long cycle life. High power charge and discharge: Max discharge rate can reach 40C. Extremely long cycle life: More than 20000 time, 10 times longer than lithium battery.

What is a lithium-titanate battery?

A lithium-titanate (LTO) battery is a rechargeable energy storage device that utilizes lithium titanate oxide as its anode material. This design allows for faster charging times, enhanced safety, and a longer lifespan compared to traditional lithium-ion batteries.

What is a lithium-titanate (LTO) battery?

Lithium titanate (LTO) batteries are a type of rechargeable battery known for their rapid charging capabilities and long cycle life. Understanding their characteristics, advantages, and compatible chargers is essential for anyone considering their use in various applications. What is a lithium-titanate (LTO) battery and its key features?
