

## SolarMax Energy Systems

# Lithuania has energy storage inverters

## Overview

---

Which energy storage facilities will provide Lithuania with instantaneous electricity reserve?

The Government of the Republic of Lithuania has appointed Energy Cells as the operator of storage facilities that will provide Lithuania with an instantaneous electricity reserve. The start of the design works for the energy storage facilities system. The start of the testing works of the energy storage facilities system.

How many battery energy storage systems are there in Lithuania?

The four battery energy storage systems (BESS), 50MW/50MWh each, have been handed over by Fluence and are now providing services to Litgrid, the transmission system operator (TSO) in Lithuania. They followed a smaller, 1MW/1MWh pilot project to test the use case back in 2021.

How will Lithuania's energy storage system work?

Energy storage system will ensure the security of supply of Lithuania's energy system and the possibility to operate in an isolated mode. for Lithuania before the synchronisation with the continental European networks (CEN), will be used for the integration of energy generated from renewable energy sources after the synchronisation.

How much electricity does Lithuania generate?

According to Litgrid's (Lithuania's electricity transmission system operator) preliminary data, in the first half of the year 2024, the national electricity generation amounted to 3,783.4 GWh, of which RES accounted for 2,990.1 GWh.

How much does the EU spend on energy storage in Lithuania?

In late 2024, the EU approved a €180 million (US\$188 million) support package for over 1.2GWh energy storage in Lithuania, covering a maximum of

30% of the projects' capital expenditure costs via a competition auction set to conclude before the end of 2025.

Will lavastream install a thermal power plant in Lithuania?

Lavastream plans to install a thermal power plant with a capacity of around 30 MW in Klaipėda and 15 MW in southwestern Lithuania by 2028, as well as a geothermal-geological long-range electricity storage system.

## Lithuania has energy storage inverters
