

SolarMax Energy Systems

Malawi Energy Storage Systems

Overview

The \$20 million BESS project will stabilise Malawi's hydropower-reliant grid, enhance electricity access, and reduce carbon emissions by 10,000 tonnes annually. This initiative is part of GEAPP's BESS Consortium, which aims to deploy 5 GW of storage in low-middle-income countries by 2024. How can Malawi achieve a cleaner energy future?

The project will also contribute to a cleaner energy future for Malawi, reducing reliance on costly diesel generators, cutting carbon emissions by ~10,000 tonnes annually, and unlocking the full uptake of at least 100 MW of variable renewable energy, such as solar and wind power, into the grid.

What is Malawi's energy supply?

Malawi's energy supply is dominated by biomass (firewood, charcoal, agricultural and industrial wastes) accounting for 84% of the total primary energy supply. The total installed electricity capacity is currently at 351 MW with around 98% Hydro on the shire river.

What is the purpose of a fuel storage facility in Malawi?

The purpose of Government fuel storage facilities in Malawi includes utilizing them as inland dry ports and common-user facilities, ensuring effective participation of Malawian nationals in the petroleum products market, and developing guidelines for franchising of liquid fuel outlets.

Can Malawi achieve universal electricity access by 2030?

We look forward to continuing our partnership with the Government of Malawi to support the country's ambition to achieve universal electricity access by 2030 as we pursue the goals of Mission 300: connecting 300 million Africans to electricity by 2030 at unprecedented scale and speed."

How can collaboration improve the resilience of Malawi's grid?

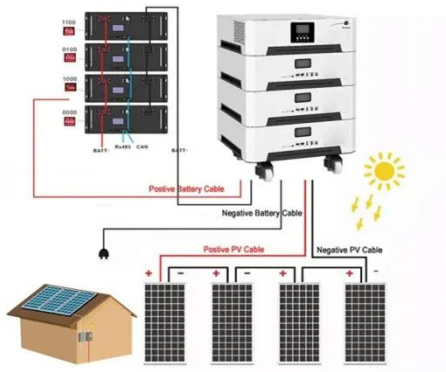

By enhancing the stability and resilience of Malawi's grid, it demonstrates the

power of collaboration in advancing energy access, reducing emissions, and supporting livelihoods.

Is Malawi a proof point for geapp's Bess project?

By breaking ground for this BESS project (and its subsequent completion expected in 2025), Malawi is an important proof point for the BESS Consortium launched by GEAPP at COP28 to secure 5 gigawatts (GW) of BESS commitments in low and middle income countries (LMICs) by the end of 2024.
