

## SolarMax Energy Systems

# Maldives solar energy storage lithium battery

### LIQUID COOLING ENERGY STORAGE SYSTEM

**EMS** real-time monitoring  
No container design  
flexible site layout

Cycle Life  
**≥8000**

Nominal Energy  
**200kwh**

IP Grade  
**IP55**

## Overview

---

Why solar PV with storage in Maldives?

Solar PV with storage has proven suitable and competitive for Maldives' high penetration of renewable energy (POISED type B projects), with an average fuel savings of 25%. The concept design of hybrid systems (efficient diesel generators + solar PV plants + energy storage) has resulted in success for Maldives.

Are solar-photovoltaic-battery diesel hybrid energy systems effective in Maldives?

The solar-photovoltaic-battery diesel hybrid energy systems, introduced by the POISED project, have been achieving fuel savings of up to 28% compared to diesel-only generator sets in Maldives. This makes the case that investing in renewable energy is financially sound and contributes to de-risking financial investments in renewable energy in Maldives.

What is the main energy supply in Maldives?

These are calculated based on 2011 data for all the countries except for obtaining the SIDS average where 2009 figures are used. The main primary energy supply in Maldives is still dependent on imported fossil fuel (99.9%). Bulk of this imported fuel is diesel and the main energy used for production of electricity and transport.
