# Middle East rooftop flat panel solar panel purchase

## Overview

---

Are rooftop solar panels a viable option in the Middle East?

Rooftop solar PV panels are common in a number of countries, but are only now gaining real popularity in the Middle East. Despite the sunny climates, there are still a number of barriers to switching to solar PV. Electricity tariffs are generally low, discouraging customers from switching to self-generated electricity.

Are rooftop photovoltaic panels becoming more popular?

There has been a strong surge in domestic installation of rooftop photovoltaic panels in larger cities. For projects under 1 MW, net metering regulations came into effect in September 2015. The government is targeting at least 1 million customers and adding approximately 3,000 MW of solar power through net metering.

Can solar panels be installed on residential properties?

In line with these targets, both countries have launched initiatives to install solar photovoltaic (PV) panels on residential properties as well as on public and private facilities.

How many new solar power plants are being built in EETC?

Currently, the construction of four additional new solar power plants with a capacity of 200 MW is engaged on site. Kom Ombo PV Solar Project, In October 2019, the EETC signed a solar PPA with a developer for a 200 MW plant at a price of \$0.0275 per kWh that is expected to be completed in Q1 2021.
