

SolarMax Energy Systems

Moldova 950MW solar thermal photovoltaic hybrid power station

Overview

What is the electricity system like in Moldova?

The electricity system in Moldova is characterised by its reliance on imports. In 2020, of its 4.4 TWh of electricity demand, 81% was supplied by imports, either from Ukraine (4%) or from the Cuciurgani-Moldavskaya GRES (MGRES) gas-fired power plant (77%) located in the breakaway region of Transnistria.

What is 950 MW CSP & 250MW PV?

The 950 MW hybrid project (700MW CSP & 250MW PV), fourth phase of the Mohammed Bin Rashid Al Maktoum Solar Park, is the largest single-site Concentrated Solar Power (“CSP”) plant in the world using a state-of-the-art combination of a Central Tower (100 MW) and Parabolic Trough (600 MW) as CSP technologies to collect energy from the sun.

Why is Moldova's electricity supply so vulnerable?

Since November 2023, the MGRES gas-fired power plant in Transnistria is making up for the electricity import deficit from Ukraine. This heavy reliance on external sources, particularly from politically sensitive regions, makes the Republic of Moldova’s electricity supply extremely vulnerable.

Does Moldova have a power grid?

Moldova’s electricity grid was predominantly built in the time of the Soviet Union, making it relatively old and inefficient. It is synchronously interconnected with Ukraine’s Integrated Power System (IPS) and, in turn, Russia’s Unified Power System (UPS) in the northern and south-eastern parts of the grid.

What is 950mw Phase 4?

The 950MW Phase Four project uses three hybrid technologies — 600 megawatts from a parabolic basin complex, 100MW from the CSP tower, and 250MW from photovoltaic solar panels. The project also has a thermal energy

storage capacity of 5,907 megawatt hours (MWh) as well as 70,000 heliostats that track the sun's movement.

How important is Moldova's cross-border power system?

Geographically positioned between Romania and Ukraine, the cross-border power system of the Republic of Moldova is critical for regional energy security and regional integration with the European and Moldova-Ukraine energy markets.
