Moldova has a chemical energy storage power station

Overview

The Republic of Moldova will install a 75 MW energy storage system (BESS) and 22 MW internal combustion engines as part of a project funded by the U.S. Government through USAID. The Ministry of Energy has announced that a tender has been launched for this purpose. How has Moldova restructured its electricity distribution network?

As part of the reforms, Moldova restructured and partially privatized its electricity distribution network, including Premier Energy, a private company that controls 70 percent of the country's electric distribution grid.

Does Moldova need energy?

Moldova is almost totally dependent on fossil fuel and electricity imports, with natural gas serving most of its energy needs. The government plans to diversify the energy mix with renewables such as wind and solar.

How does Moldova share energy data?

Moldova shares energy data through five annual International Energy Agency (IEA)/Eurostat/UN Economic Commission for Europe (UNECE) joint questionnaires.

What is Moldova's energy policy?

Moldova's energy policy focuses on improving integration in regional markets, strengthening energy security, improving compliance with EU directives, increasing electricity generation capacity and promoting energy efficiency and renewable energy.

How much electricity does Moldova produce?

The country produces only about 20 percent of its annual electricity consumption from natural gas-fired combined heat and electricity power plants. Moldova has one hydropower plant, the Costesti Hydropower Plant. Moldavskaya GRES (MGRES) in the separatist region of Transnistria supplies

the vast majority of the remaining 80 percent of electricity.

Is Moldova a member of the Energy Community?

Moldova has been a member of the Energy Community since 2010 and signed an Association Agreement with the European Union on 27 June 2014. It therefore had until December 2017 to make its legislation conform to the EU acquis communautaire, which
