Moldova portable programmable power supply

Overview

What is a programmable power supply?

Programmable power supplies (CVCC variable DC power supplies, DC power supplies) are power supplies that can be operated in constant voltage (CV) mode or in constant current (CC) mode automatically depending on load conditions within the range of voltage values and current values that have been set ahead of time.

What types of DC Programmable power supplies are available?

We offer a wide variety of DC programmable power supplies, including bi-directional power supplies (regenerative power supplies) and high-precision reference voltage generators (PSX series).

Why are programmable variable power supplies important?

Whether testing medical devices, sensors, or communication circuits, clean power is essential for repeatable results. In production and validation, programmable variable power supplies streamline testing by automating voltage sweeps, stress tests, and device characterization.

Is TDK-Lambda a programmable power supply?

The standard Z+ series now also includes USB and optional LAN. TDK-Lambda's lineup of programmable power supplies consists of the Genesys series suitable for 19 inch racks mounted and the portable benchtop-type Z+/ZUP series for applications such as researching, and all are UL-listed products with RS232C/RS485 in their standard form.

Where can I buy programmable power products?

For U.S. customers who want to get these products in your own hands, take a look at our Online Store to browse and order products for your business. We're excited to introduce two new websites at AMETEK Programmable Power. Select from the buttons below to visit ProgrammablePower.com or

VTlinstruments.com now.

What are the different types of programmable power sources?

Single-channel, 2-channel, and 4-channel configurations are available. Providing enhanced 3-channel programmable power, the Asterion DC ASM series features three independent, isolated 1700W channels for a combined 5100W total output power. The California Instruments Tahoe Series is a two-quadrant precision programmable AC and DC source.

Moldova portable programmable power supply

Adjustable DC Power Supply (0-30 V 0-10 A) with ...

This variable DC power supply is a very stable, regulated DC power supply. It has the characteristics of low ripple and noise, high accuracy, ...
