Monaco high voltage inverter

Overview

What is a high voltage dc-ac sine wave inverter?

High voltage DC-AC sine wave inverters accept wide input ranges of 450V to 800Vdc. High frequency PWM technology enables high efficiency, compact construction and low weight. ABSOPULSE has recently added the CSH 500-F6 to its line of high input voltage DC-AC sine wave inverters.

What is the best inverter for an Me-arc?

I have a Magnum ME-2012 modified sine wave inverter/charger with an ME-ARC remote and BMK. Thinking about upgrading to a pure sine inverter. Most probable choices are Magnum MS2012, MS2812 or the hybrid MSH3012. The second is 20% more expensive than the first and the hybrid is 13% more than the second.

What is a good voltage drop for an inverter?

I tend to use the Ancor marine voltage drop and ampacity charts on westmarine.com, but there are plenty of online calculators that all do the same thing. Less than 2% voltage drop is considered good for most applications. MS2012- if you've got 5' or less between the batteries the inverter, the cables should be 2/0.

Does a 120 volt inverter work if the board is bad?

Even if the board is bad the rest of the 120 volt would work if that was the only problem. The most of the other circuits go through the inverter. His system may be different then mine, I have 2 legs of 120 volt that go through the inverter. He should check the breaker (s) on his inverter to start with.

Are Magnum inverters dual-in or dual-out?

According to the Magnum owners Manual, MS series inverters 2012, 2812, 2024, 4024 and 4048 are dual-in, dual out. More sharing options. That's good news, I hope.

How do I increase the power of my inverter/charger?

You'll need to increase the wire size from the batteries to the inverter/charger to accommodate the 50% increase in power. You may also have to rewire the output 110 VAC side as well to accommodate for additional current and possibly additional circuits.

Monaco high voltage inverter

Monaco Electric problems

Just the Inverter, witch shows everything is charging. I've checked breakers, fuses, and the battery disconnect. Crazy thing is there are a few things that do work. The slides are ...
