# Morocco three-phase inverter construction

**European  
Warehouse**

**7-15 days**  
Delivery

**ONE-STOP SOLUTION**

**65kWh 30kW**

**130kWh 30kW**

**130kWh 60kW**

## Overview

---

Why is Morocco expanding its solar power projects?

Morocco is expanding its solar power projects in a move to have a reliable energy source, after having completed bidding for the second and third phases of the Ouarzazate Concentrated Solar Power (CSP) project.

Will Morocco have a solar power plant?

According to the World Bank, when complete the concentrated solar power plant in Morocco will supply electricity to 1.1 million Moroccans by 2018. The country which is famous for its meandering medinas and the scenic Atlas Mountains will now be known as the largest solar power plant.

What was Morocco's first solar energy project?

The Noor solar energy plant was the country's first renewable energy project. Four more solar plants were expected to follow, providing a total of 2 GW of power by 2020 to cover the country's energy demands, which were met by imports to the tune of up to 95%. Morocco's solar-power policy was also to help minimize global warming.

What is pvout (photovoltaic output) in Morocco?

PVOUT (photovoltaic Output) is an indicator (kWh/kWp/year) that evaluates the potential solar energy production per unit of solar panel capacity installed over a long period. The average annual PVOUT in Morocco ranges from 1600 to 1900 kWh/kWp/yr depending on the location. Figure 11. Map of yearly photovoltaic output in Morocco (kWh/kWp/year).

How much solar power does Morocco have in 2023?

According to IRENA's "Renewable Capacity Statistics" report, the global installed capacity of concentrated solar power (CSP) systems by the end of 2023 reached approximately 6876 MW, with Morocco accounting for nearly 20% of this total. Morocco is the leading country in Africa in terms of CSP

capacity, followed by South Africa with 500 MW.

Who is a concessionary power producer in Morocco?

The concessionary power producers include Jorf Lasfar Energy Company (JLEC) with a capacity of 2080 MW, Compagnie Eolienne du Détroit (CED) with 54 MW, and SAFI Energy Company (SAFIEC) with 1386 MW. A list of the various players in the development of the energy sector in Morocco is presented in Appendix A. 3. Solar Resources Potential in Morocco
