

SolarMax Energy Systems

Namibia energy storage photovoltaic power generation

Overview

Does Namibia have a big solar project?

Namibia has much larger solar and renewable energy development aspirations, as well. Both Namibia and neighboring Botswana are working with the World Economic Forum's (WEF) Global Future Council on Energy to develop a huge, five-gigawatt (GW) solar power project over the next two decades.

Where will Namibia's 100 MW solar power plant be located?

In 2022, the Namibian government unveiled plans for a 100 MW solar power plant to be located at the Hardap Irrigation Scheme in southern Namibia. The project is part of the country's efforts to significantly increase its renewable energy capacity and reduce its reliance on fossil fuels.

Can solar power be a viable energy solution for Namibia?

The Kalkbult project has been instrumental in demonstrating the viability of solar power as a large-scale energy solution for Namibia. It has also created local employment opportunities and contributed to the development of the local economy. 3. The 100 MW Solar Power Plant at the Hardap Irrigation Scheme.

What is Namibia's first large-scale solar power plant?

1. The 5 MW Solar Power Plant at Omburu One of the first large-scale solar power plants in Namibia is the 5 MW solar power plant located at Omburu, in the Erongo Region. This project, commissioned in 2014, was a significant milestone in Namibia's solar energy journey.

How many solar PV plants are there in Namibia?

In 2018, the first twin solar PV plants in Namibia were opened in Gobabis in the Omaheke region. Ejuva One and Ejuva Two solar PV each have an installed capacity of 5 MW⁵. They have the capacity to feed 25.8 GWh into NamPower's

grid each year.

What are Namibia's solar and wind energy projects?

Many of Namibia's solar and wind energy projects are located in rural areas, where they provide much-needed infrastructure, job opportunities, and income for local communities. These projects also support the development of local businesses and contribute to the overall economic growth of rural regions.
