New Energy Battery Cabinet Replacement Conditions

Overview

Is battery replacement a part of normal maintenance?

Battery replacement in UPS equipment is considered part of normal maintenance and is evaluated as part of the original Certification (Listing). The necessary markings and instructions to ensure continued safety and certification are identified in the instructions and the individual certification documentation. **Markings and Installation Instructions.**

Can I replace the batteries of my ups?

It is permissible to replace the batteries of a UPS with specific types of batteries that are identified by the manufacturer of the UPS system on the equipment and within the product instructions as required by UL 1778.

What changes have been made to the battery code?

ionary Battery Committee's Codes Working Group. Tentatively approved changes include: Corrosion prevention – Reference to mating of dissimilar metals will be removed. Antioxidant material suitable for the battery connection must be.

What should be removed from a battery connection?

Reference to mating of dissimilar metals will be removed. Antioxidant material suitable for the battery connection must be used when recommended by the battery manufacturer. Battery terminal conductors – An informational note will clarify that pre-formed conductors are acceptable to prevent stress on battery terminals, as are.

Do I need a battery disconnect?

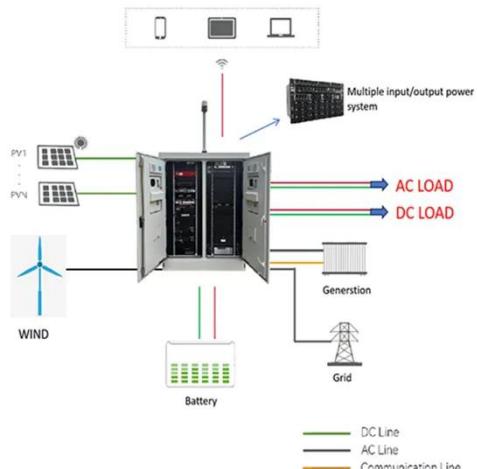

or the battery disconnect requirement is unknown. The thinking by many is that the level is based on the minimum voltage shock level. However, electric shock is only one of many battery hazards and installing a battery disconnect does not eliminate or reduce the shock hazard for maintenance personnel.

wor.

What should be included in a battery informational note?

ed when recommended by the battery manufacturer. Battery terminal conductors – An informational note will clarify that pre-formed conductors are acceptable to prevent stress on battery terminals, as are fine-stranded cables (e.g., “weldin
