New Russian Communications Base Station

Overview

MTS presented the first Russian 5G base station "Irteya" at the All-Russian CIPR-2025 conference. Will a new LTE base station be made in Russia?

The head of the Ministry of Digital Science Maksut Shadayev said earlier in 2021 that an agreement had been reached with two manufacturers on localization in the Russian Federation, the transfer of rights to Russian partners for the production of modern LTE base stations.

How many base stations are there in Russia?

According to Vedomosti, by the end of November 2020, there are about 90 thousand base stations in the Russian capital, and with the launch of 5G networks, the number of such equipment will at least triple.

Will Russian base stations speed up the development of Russian components?

Experts consider the mechanism timely, but emphasize that it will not speed up the development of Russian components. In early October 2022, it became known about the decision of the Government of the Russian Federation to support manufacturers of Russian base stations for 4G- and 5G networks .

When will Russian base stations be activated?

The equipment installed in the network will be activated in the fall of 2023. By July 2023, forward contracts are in effect, under which the Big Four operators undertake to purchase 75 thousand Russian base stations worth more than 100 billion rubles until 2030.

What happened to Russian base stations in 2022?

All of them, after February 24, 2022, decided to leave the Russian market. Meanwhile, there is no mass production of domestic base stations in Russia by the middle of 2023 - their development lasts for years, moreover, several companies work in this direction, but none of them has launched the conveyor at full capacity, the newspaper notes.

Will Russia support Russian base stations for 4G & 5G networks?

In early October 2022, it became known about the decision of the Government of the Russian Federation to support manufacturers of Russian base stations for 4G- and 5G networks . { {quote 'As for 5G and 4G, we have introduced a restriction on the use of new foreign base stations since 2023, now a lot of work is underway with telecom operators.
