

SolarMax Energy Systems

New energy storage project in Iceland

Overview

New research coming out of the University of Iceland introduces the novel idea of adding EES technologies such as Lithium-ion batteries across the country's grid to store it's 100 percent renewably sourced electricity, effectively creating the world's first renewable "green battery."

New energy storage project in Iceland

Carbon Iceland Project Launch: Turning CO2 from ...

This will allow Carbon Iceland to capture more than one million tons/year of CO₂ that will be used to produce renewable fuel for the Icelandic ...
