New independent energy storage policy

Overview

Does state energy storage policy matter?

While decisions carried out by federal regulators and regional market operators have an impact on state energy storage policy, state policymakers—and state legislators in particular—are instrumental in enacting policies that remove barriers to adoption and encourage investment in storage technologies.

Can state energy storage policies be used in underserved and low-income communities?

The intent is to create a body of reference material that can be used in state energy storage policymaking across diverse geographical and regulatory jurisdictions. The report highlights emerging strategies used by the leading states to advance energy storage adoption in underserved and low-income communities.

What are the different types of energy storage policies?

Approximately 17 states have adopted some form of energy storage policies, which broadly fall into the following categories: procurement targets, regulatory adaption, demonstration programs, financial incentives, and consumer protections. Below we give an overview of each of these energy storage policy categories.

What is a storage policy?

All of the states with a storage policy in place have a renewable portfolio standard or a nonbinding renewable energy goal. Regulatory changes can broaden competitive access to storage such as by updating resource planning requirements or permitting storage through rate proceedings.

Can energy storage be affordable and accessible?

As energy storage becomes an increasingly integral tool to deliver numerous

benefits to communities and to the electric grid, the question of how to make this new technology broadly affordable and accessible becomes more urgent, particularly for state agencies tasked with meeting clean energy goals.

How can States advance energy storage adoption in underserved and low-income communities?

The report highlights emerging strategies used by the leading states to advance energy storage adoption in underserved and low-income communities.
