

SolarMax Energy Systems

New solar system prices in Türkiye

Overview

How much does a Turkish Solar System cost?

The Turkish authorities have set a 10-year feed-in tariff (FIT) of TRY 1.06 (\$0.0545)/kWh for PV systems that are installed between July 1, 2021, and December 31, 2030. Solar projects with Turkish PV components will be given an additional five-year tariff of TRY 0.2880/kWh.

How much solar energy does Türkiye have?

Türkiye's solar energy capacity doubled from 9.7 GW in July 2022 to exceed 19 GW by the end of 2024. By August 2024, the country had already exceeded the 18 GW target set for 2025 in the National Energy Plan (NEP) by the Ministry of Energy and Natural Resources (MENR).

How many solar panels will Turkey install by 2026?

The Turkish Photovoltaic Association's PV roadmap report released in 2019 predicted that the country will install a cumulative 38GW of PV systems by 2030. In another study released in May 2018, Istanbul-based Shura Energy Transition Center predicted that the cumulative installation of PV systems in Turkey will exceed 20GW by 2026.

Who makes the most solar panels in Turkey?

CW Energy, since its inception in 2008, has grown to be one of the largest solar panel manufacturers in Turkey, boasting a remarkable 1.8 GW production capacity. The company's versatile approach encompasses a range of services, marking it as a significant player in the solar industry. 3. Elin - Sirius.

Which solar companies in Turkey will increase production capacity by Q1 2024?

With three production bases across Turkey, Smart Solar Technologies projects a substantial increase in production capacity by Q1 2024. Listed on the BIST50

Board of the Istanbul Stock Exchange in 2023, the company emphasizes responsibility and human rights. 7. Ankara Solar.

How has solar energy benefited Türkiye?

Over the past two and a half years, solar and wind energy combined have prevented \$15 billion in natural gas imports, reinforcing Türkiye's energy independence and reducing dependency on fossil fuels. Solar energy alone generated 52 TWh of electricity during this period, which accounted for 6% of the country's total electricity supply.
