

SolarMax Energy Systems

Nordic flat-land photovoltaic panel manufacturers

Overview

Why are Nordic solar panels better than standard solar panels?

Because they are more efficient than standard glass solar panels you'll get higher production from a relatively small size. Together with the minimum thickness of only 3mm they are ideal for use on campers, caravans, or other recreational vehicles. The Nordic series is fitted with a smooth surface and is not designed to be walked upon intensively.

Is Nordic solar integrating battery storage into a solar park project?

Operating in 12 European countries, the solar energy company Nordic Solar is investing heavily in integrating battery storage into its portfolio of solar park projects and is now launching the construction of its first project, which is located in Denmark.

What's new in the Nordic models?

All Nordic models have been upgraded with newer and more efficient solar cells, increasing the peak power output. The Flush models are shipped without stainless steel eyes allowing for seamless integration on hard surfaces.
