

SolarMax Energy Systems

Offshore battery cabinet power supply

Overview

Can a floating battery power barge deliver high-capacity shore power?

Mobile shore power solutions, with- or without a battery will ensure port authorities compliance to regulations. This analysis outlines a floating battery energy storage platform - referred to as the power barge - capable of delivering high-capacity shore power to offshore construction vessels.

Why do we need a backup battery cabinet?

Through cutting-edge research and innovation, advanced engineered power products for backup battery cabinets have become essential to our energy future. When the power goes out, battery backups ensure that the Internet, cloud-based data, financial and health records stay accessible.

How many battery units are on the power barge?

The core of the energy storage system on board the power barge consists of twelve containerized lithium-ion battery units based on the CATL EnerX 0.5P platform.

Is shore power mandatory for containerships?

Shore power for containerships is mandatory from 2030 onwards as per FuelEU. The creation of shore power infrastructure remains difficult and takes a long time however. Mobile shore power solutions, with- or without a battery will ensure port authorities compliance to regulations.

What are Arimon battery cabinets?

Arimon uninterruptible power supply (UPS) backup battery cabinets are available for either front access batteries or top terminal (monobloc) batteries. All battery cabinets are constructed from heavy gauge steel with a durable welded frame and acid resistant powder coated finish available in a wide range of colors.

Does a shipboard generator need a high voltage shore connection?

Vessels equipped with a high voltage shore connection designed to power the vessel with the shore power alone, enabling the shipboard generators to be shut down while in port, are to comply with the requirements given in the ABS Guide for High Voltage Shore Connection.

Offshore battery cabinet power supply

Power Supplies for Marine & Offshore

EA's regenerative bidirectional supplies are uniquely suited for the marine industry with respect to power controlling systems for photovoltaics inverters ...
