Peru 5G base station contact

Overview

Is 5G technology a good idea in Peru?

By evaluating a regulation proposal of 5G technology in Peru, it is shown that the implementation of this technology will bring benefits in the social and economic sectors of the country. The 5G technology has high expectations regarding its launch.

Are 5G antennas being dismantled in Peru?

This post is corroborated by a press release published by the local government in November 2019. According to these sources, the antenna tower was a radio and cell phone transmission antenna, with no evidence that it was linked to 5G. Hence, the claim that 5G antennas are being dismantled in Peru due to their dangers is false.

What is 5G NSA?

5G services are provided to customers at similar prices to 4G because 5G NSA is only available in certain areas. Telecom operators are allowed to use existing frequencies on the AWS, 2.5 GHz and 3.5 GHz bands. 3. Has 5G been launched for industrial purposes?

For which sectors?

No. 5G for industrial purposes has not been launched. 4.

How does the Radioelectric spectrum work in Peru?

In Peru, the radioelectric spectrum being a finite resource, is administered by the Ministry of Transport and Communications (MTC). It is known that in various parts of the Peruvian territory there is no coverage, thus this limits the use of the maximum data transmission speeds that it already has for technologies such as 3G or 4G.
