

## SolarMax Energy Systems

# Peruvian Photovoltaic Power Generation and Energy Storage Operation Company

**LPR Series 19'  
Rack Mounted**

## Overview

---

What technological advances are applied in photovoltaic solar energy plants in Peru?

Finally, we can mention one of the most important technological advances applied in photovoltaic solar energy plants in Peru, the use of photovoltaic panels called bifacial solar panels. Bifacial solar panels can capture energy on both sides of the photovoltaic solar panel, whereas monofacial modules only receive energy on their front side .

What is the development of solar PV energy in Peru?

Finally, Figure 21 shows the development over time of the installed capacity in MW of solar PV energy in Peru. Figure 21. Evolution (years) of the solar photovoltaic installed capacity (MW) in Peru. Figure 21 shows that the first stage of solar PV energy in the country began in 2012, with strong growth from 2012 to 2023.

What percentage of solar PV installations are in Peru?

Solar PV capacity accounted for 16.4% of total power plant installations globally in 2023, according to GlobalData, with total recorded solar PV capacity of 1,496GW. This is expected to contribute 33.7% by the end of 2030 with capacity of installations aggregating up to 4,822GW. Of the total global solar PV capacity, 0.03% is in Peru.

Where are solar energy plants located in Peru?

These regions are part of the Coast Desert of Peru, in which nine photovoltaic solar energy plants are in operation in 2024. Also noteworthy are the northern regions of the country (i.e., Tumbes and Piura and part of the Sechura desert), which, despite their attractive solar resources, have not been used to date.

Can Peru generate electricity from a solar energy source?

This article presents the enormous potential of Peru for the generation of

electrical energy from a solar source equivalent to 25 GW, as it has in one of the areas of the world with the highest solar radiation throughout the year.

What is the solar energy industry doing in Peru?

The solar energy industry is following the advances of the wind energy industry in Peru, where all stakeholders (communities, authorities, investors, and NGOs, among others) of the territory are accepting this clean energy as a road to reach sustainable development .

## Peruvian Photovoltaic Power Generation and Energy Storage Operation

---

### Electricity sector in Peru

However, electricity generation is not evenly divided between the two dominating sources. In 2006, 72% of Peru's total electricity generation came from hydroelectric plants (total ...
