

## SolarMax Energy Systems

# Photovoltaic and wind power generation systems in Cape Verde

## Overview

---

What is the largest solar power plant in Cape Verde?

Largest solar power plant in Cape Verde on Sal Island was inaugurated by Cape Verde's Ministry of Energy and Commerce that will help the country to save energy. This is true given that Aguas de Ponta Preta developed a 5 MW solar plant in Santa Maria that is quite significant to the country's renewable energy plan.

Why does Cape Verde need a solar project?

Project is located in Santa Maria on the island of Sal. This is why the completion of the solar installation also highlights Cape Verde's desire to strengthen its renewable energy capacity. Tourism is among the leading sectors in many countries, meaning that it is vital for energy consumption not to lead to carbon footprints.

What will Cape Verde's new solar plant do?

The new solar plant will make Cape Verde one of the leading nations in the use of renewable energy within the region thus laying the foundation for what could be a more sustainable form of energy besides the traditional dependence on fossils. Read also Mtentu Bridge: Africa's Tallest and Longest Cantilever Bridge.

Are Cape Verde communities using a solar and wind-based micro-grid?

At least three communities in Cape Verde are already using a solar and wind-based micro-grid. A microgrid is a local electricity grid. It includes electricity generation, distribution to customers, and, in some cases, energy storage.

What is the energy sector in Cabo Verde?

Direcção Geral da Energia de Cabo Verde 2010 2011 Cape Verde energy sector is strongly characterized by consumption of fossil fuels (derived oil-primary imported oil), biomass (wood) and use of renewable energy

particularly wind and solar power.

How is electricity produced in Cape Verde?

Electricity in Cape Verde is primarily produced by thermal power stations running on heavy fuel or diesel (97%). There is also a small percentage (3%) of wind energy production. ELECTRA, the national electricity company, operates all over the country, managing 18 diesel power stations of different capacities (with a total capacity of).

## Photovoltaic and wind power generation systems in Cape Verde

### Towards 100% renewable islands in 2040 via generation

...

The robust analysis obtained by combining scenarios and load levels provides a thorough view of Cape Verde's energy system to consider in future energy policy design.

### ENERGY STORAGE SYSTEM

**Product Model**  
 HJ-ESS-215A(100KW/215KWh)  
 HJ-ESS-115A(50KW/115KWh)

**Dimensions**  
 1600\*1280\*2200mm  
 1600\*1200\*2000mm

**Rated Battery Capacity**  
 215KWH/115KWH

**Battery Cooling Method**  
 Air Cooled/Liquid Cooled

### Cape verde photovoltaic energy storage oem , Solar Power ...
