

SolarMax Energy Systems

Photovoltaic energy storage cabinet structure patent

Overview

The utility model relates to the technical field of energy storage, and particularly discloses a photovoltaic energy storage cabinet, which comprises at least one battery cabinet and a control cabinet, wherein the battery cabinet comprises a main cabinet body and a cover body which are detachably connected, and cable through holes are formed in two sides of the cover body; the main cabinet body comprises a battery pack and an outer shell, wherein a first electrical interface and a second electrical interface are arranged on the top surface of the battery pack; the control cabinet is provided with at least two insertion grooves on an outer vertical surface of one side connected with the battery cabinet, one outer vertical surface of the battery cabinet is provided with an insertion plate matched with the insertion grooves, the other outer vertical surface of the battery cabinet is provided with insertion grooves with the same number and positions as the insertion plates, the adjacent surfaces of the two connected sides of the battery cabinet and the control cabinet are provided with connecting grooves, and threaded holes are formed in the connecting grooves and used for assembling connecting pieces.

Photovoltaic energy storage cabinet structure patent

Photovoltaic energy storage cabinet chassis sheet metal shell

The photovoltaic energy storage market has an unprecedented demand for cabinets, chassis, and sheet metal shells, which are generally used for battery protection and ...
