

SolarMax Energy Systems

Photovoltaic energy storage system installed on the roof of the office building

Overview

How does a rooftop solar PV system work?

Converts solar energy into electricity. This can be used to meet the building's own energy consumption requirements or, in certain situations, fed back into the electrical grid. Rooftop solar PV systems are distributed electricity generation options, which help to meet a building's energy needs, or provide electricity within.

Can commercial solar panels be installed on a roof?

Roof installation is also a good option for commercial solar installation, especially since office buildings, warehouses, factories and other similar spaces often have vast, flat roofs that are ideal. However, the roof is not the only place where commercial solar panels might be installed.

Does a solar PV system need a fire/roof classification?

4.1.2 Solar PV systems installed on grade: Solar PV panels that are part of a stand-alone, ground-mounted solar PV panel structure, with no use and no potential use underneath are generally considered equipment and therefore the fire/roof classification requirements would not apply.

Can a building official waive structural calculations for solar PV installations?

3.1.1 Exemption from structural calculations: The building official may waive the requirement for structural calculations for solar PV installations on top of existing roofs if the official can readily determine that the additional weight of the new solar PV system on the roof does not affect the structural integrity of the building.

What is an example of a solar PV installation?

An example of this type of installation is a carport structure having solar PV panels as the roof.

Who should install a rooftop PV system?

All rooftop PV systems should be installed by reputable solar installers. American Board of Certified Energy Practitioners Commercial Rooftop PV System, Alcatraz Island (NABCEP). Photo credit: National Renewable Energy Laboratory Will a rooftop PV system impact roof drainage, or maintenance of other rooftop systems?

No.
