

## SolarMax Energy Systems

# Photovoltaic grid-connected hybrid inverter

## Overview

---

In short, a hybrid solar inverter manages the flow of electricity among solar panels, battery, home loads, and the grid within a single inverter. It's an intelligent device that can easily switch between multiple power modes (solar, battery, and the grid) to provide an uninterrupted power supply.

 Efficient  
Higher Revenue

 Intelligent  
Simple O&M

 Flexible  
Abundant Configuration

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPPT Trackers, 100% DC Input Oversizing
- Max. PV Input Current 15A, Compatible with High Power Modules
- IP65 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection
- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation

## Two-stage grid-connected inverter topology with high frequency ...

Decoupling capacitors play an important role in grid-connected inverter topologies with high-frequency link transformers for solar PV systems. These capacitors are typically ...
