

SolarMax Energy Systems

Photovoltaic inverter production in Ireland

Overview

What types of solar inverters are used in Ireland?

Microinverters are particularly well-suited for residential solar installations where shading or panel orientation issues may affect the overall system's performance. Power optimizers are another type of inverter that is commonly used in solar power systems in Ireland.

How much solar electricity is produced in Ireland?

In Ireland, around 75% is produced from May to September. If this electricity is not used in the home it is exported to the grid. It is desirable to maximise the amount of solar electricity you use in your home. You can do this by sizing the solar PV system to meet your demand.

How many watts can a solar inverter run in Ireland?

The official amperage limit for solar inverters in Ireland is 25 Amps. This works out to 5.75 kW assuming the official Irish voltage of 230 Volts. However, for a long time, you could get permission to install any inverter up to 6 kW, without issue. This is changing, as ESBN are now looking to strictly enforce the 25 A limit.

What are the ESB regulations for solar inverters in Ireland?

Understanding ESB Networks Regulations Connecting a solar PV system to the grid in Ireland requires adherence to ESB Networks (ESBN) regulations. A key aspect of these regulations concerns the maximum output current of your solar inverter. This post clarifies the current situation regarding 6kW inverters and the 25 Amp limit.

Do You stock photovoltaic modules in Ireland?

In Ireland we stock modules in various wattage and type, suitable for domestic and commercial applications. We stock everything to install and commission your photovoltaic modules, including roofing installation kits, inverters, micro-

inverters, power optimisers and more.

Which inverter brands are available in Ireland?

Popular and highly recommended brands in Ireland include SIGENERGY, Huawei and Solis. These manufacturers are known for developing cutting-edge energy solutions for home and business. We only source inverters from trusted manufacturers to guarantee that your system remains efficient and reliable over the years.

Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150W Peak Output Power
- 2 MPPT Trackers, 150% DC Input Oversizing
- Max. PV Input Current 15A, Compatible with High Power Modules

Intelligent Simple O&M

- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locates PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

Flexible Abundant Configuration

- Plug & Play, EPS Switching Under 30ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFC Function (Optional): when an arc fault is detected the inverter immediately stops operation
