

SolarMax Energy Systems

Photovoltaic on-site energy solar panel package

Overview

What is included in a solar package?

Solar packages include everything you need to get your residential system up and running. Simply determine your required energy use and select the solar kit that is right for your home. SunWatts can help you find and install the perfect solar kit for your home.

What is a solar panel kit?

Our solar panel kits for home are easy for you or a contractor to install. Each solar panel kit comes with solar panels, grid-tie inverters and mounting hardware and is customized to your energy needs and home's unique specifications. Take our quick questionnaire to create a custom solar panel kit based on your energy needs.

What are the different types of solar power kits?

Residential Kits: Tailored for homeowners aiming to lower energy bills and reduce their carbon footprint. Includes options like home solar panel kits or whole house solar power kits. **Commercial Kits:** Designed for businesses with higher energy demands, offering solar electric kits that scale with your needs.

Is a solar home kit a good investment?

A solar home kit is a great investment to supply your home with clean, renewable power. SunWatts can help you find and install the perfect solar kit for your home. Complete solar panel system kits that are the most energy efficient and reliable on the market today.

What is a photovoltaic (PV) solar power system?

A photovoltaic (PV) solar power system is a collection of components that produces electricity from sunlight. When used together, these components can be used for various purposes. There are several different types of solar photovoltaic systems including the following:.
