

SolarMax Energy Systems

Photovoltaic panel electricity generation per square meter in Europe

Overview

The average electricity consumption in Europe is around 4,000 kWh per year. However, with the use of a heat pump, this value doubles. The efficiency of solar panels currently ranges from 150 to 200 watts peak per square meter (Wp/m²).

European Solar Power: Capacity, New Installations, and Trends

European solar power continues to grow, setting a new historical record in 2024. However, the rapid momentum seen at the beginning of the decade has started to wane.
