Photovoltaic panel manufacturers contract

Overview

A Solar Power Purchase Agreement (SPPA) is a financial arrangement in which a third-party developer owns, operates, and maintains the photovoltaic (PV) system, and a host customer agrees to site.

Will EPC contracts provide for the handover of a solar facility?

EPC Contracts will not provide for the handover of the solar facility to the Project Company, and the PPA will not become effective until all commissioning and reliability trialling has been successfully completed.

Do EPC contracts impose PLDs?

Most, however, do not impose PLDs. EPC Contracts impose PLDs because the achievement of the performance guarantees has a significant impact on the ultimate success of a project. Similarly, it is important the solar facility commences operation on time given the liability the Project Company will have under other project agreements.

Can a contractor novate a supply agreement with a panel supplier?

1.10 The Contractor agrees that the Principal may assign the benefit or novate to the Contractor the supply agreement entered into between the Principal and the Panel supplier following the exercise of the Principal's Option to Free Issue Panels under clause 1.5(a) in the agreed form in Schedule [] (Supply Agreement).

Can a subcontractor increase the cost of supplying the panels?

The Contractor must provide to the Principal evidence of the cost of supplying the Panels under clause 1.16. The Contractor will not be entitled to any increase in the Contract Price above the Tender Panel Price. (ii) changes the scope of, or requirements for, work to be provided by a Nominated Subcontractor.
