Photovoltaic panel market share

Overview

The solar photovoltaic (PV) market is projected to grow from USD 339.7 billion in 2025 to USD 753.9 billion by 2035, at a CAGR of 8.3%. On grid will dominate with a 71.3% market share, while ground mounted will lead the mounting segment with a 64.8% share. How big is the solar photovoltaic market?

The solar photovoltaic market size exceeded USD 289.6 billion in 2023 and is set to expand at more than 8.3% CAGR from 2024 to 2032 driven by increasing focus on clean electricity through various solar PV targets.

Which segment dominated the PV panels market revenue in 2021?

The thin film segment dominated the PV panels market revenue in 2021 and is projected to be the faster-growing segment during the forecast period, 2022-2030 because thin film solar panels are made of robust, flexible, resilient, and lightweight materials.

Are solar PV panels profitable?

Companies in the commercial and industrial sectors are among the major consumers of solar photovoltaic panels owing to the large-scale demand for green energy. Installation economies of scale in these sectors compensate for any loss in panel efficiency, making solar PV systems profitable for large-scale generation.
