

## SolarMax Energy Systems

# Photovoltaic power generation capacity of Pakistan s communication base stations

## Overview

---

How much power does Pakistan have in 2024?

Pakistan has a total installed power generation capacity of 49,270 MW as of 13 September, 2024 which includes 28,766 MW thermal, 11,519 MW hydroelectric, 1,838 MW wind, 780 MW solar, 249 MW bagasse, 3,620 MW nuclear and 2,498 MW of net metering capacity. Currently in operation power plants.

What is the solar PV market in Pakistan?

According to GlobalData, solar PV accounted for 3% of Pakistan's total installed power generation capacity and 0.98% of total power generation in 2021. GlobalData uses proprietary data and analytics to provide a complete picture of this market in its Pakistan Solar PV Analysis: Market Outlook to 2035 report. [Buy the report here.](#)

What is the net metering capacity of Pakistan?

As of 30 June, 2024, Pakistan has an installed net metering capacity of 2,498 MW. ^ a b c d e f g h "State of Industry Report 2024" (PDF). [nepra.org.pk](https://nepra.org.pk). Retrieved 22 January 2025.

Which countries have rooftop photovoltaic installations?

Rising electricity costs and grid reliability concerns have driven industries, businesses, and urban homeowners to increasingly turn to solar solutions, including rooftop photovoltaic installations. The country has solar plants in Pakistani Kashmir, Punjab, Sindh and Balochistan.

What is GlobalData's Power Plants Database?

GlobalData's Power Plants database provides detailed profiles of over 170,000 active, planned and under construction power plants worldwide, while its macro indicators database provides historic and forecast power generation and generation capacity by technology as well as consumption, imports and

exports for over 170 countries.
