

SolarMax Energy Systems

Photovoltaic power supply and energy storage procurement

Overview

What is energy storage procurement?

Energy storage procurement is led by utilities that create markets for “preferred” energy storage system types, said Chris Goldsberry, senior director of commercial and industrial business origination for the North America operations of Spanish-owned clean energy business EDP Renewables.

What are the challenges of procurement for utility-side storage & solar-plus projects?

The challenges of procurement for utility-side storage and solar-plus projects center largely on early-stage decisions: defining the top-priority use case, but also exploring ways to get more value out of the project and to prepare for market changes over its life.

How will corporate interest in hourly matching power purchase agreements impact energy procurement?

Growing corporate interest in hourly matching power purchase agreements (PPAs) is expected to drive the pairing of PV, wind, and battery energy storage systems (BESS), with potential broader impacts on the energy procurement market, as Neil Ford reports.

Can the PV industry absorb rising demand?

The PV industry is well placed to absorb some of that rising demand. A total of 39.6 GW of new PV generation capacity was added in the United States in 2024, beating the previous record of 27.4 GW set in 2023 and taking the total to 220 GW, according to the US Energy Information Administration (EIA).

How can battery storage improve solar energy production?

Note rising interest in value streams that are locally realized, e.g., time-shifting to balance rising distributed energy resources (DERs) locally. Battery

storage can prevent solar over-production, while facilitating local high-renewables goals. It also may sometimes defer the need for a distribution upgrade (non-wires alternative).

How do I choose a utility procurement company?

Apply judgement, as no single document from another utility will address all of your needs. Review your utility's standard procurement template to be sure it will accommodate the type of procurement and the kinds of companies that you wish to hear from. For some projects, companies with regional or local roots may provide add-on benefits.
