

SolarMax Energy Systems

Photovoltaic solar panels in rural Denmark

Overview

Denmark has lower solar insolation than many countries closer to Equator, but lower temperatures increase production. Modern solar cells decrease production by 0.25% per year.

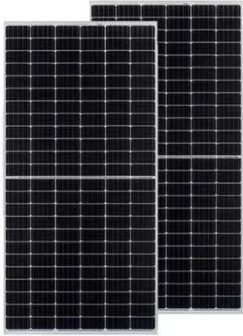

Solar power in Denmark amounts to 4,208 MW of grid-connected PV capacity at the end of March 2025, and contributes to a government target to use 100% renewable electricity by 2030 and by.

Solar power provided 1.4 TWh, or the equivalent of 4.3% or 3.6% of Danish electricity consumption in 2021. In 2018, the number was 2.8 percent. Denmark has lower solar insolation than many countries closer to Equator, but lower temperatures.

• • • • • .

Solar heat plants are widespread in Denmark, with a combined heating capacity of 1.1 GW in 2019. A large solar-thermal district heating plant 55% of the year.
