

SolarMax Energy Systems

Poland s installed capacity of flow batteries

Overview

The Polish Economic Institute reported that in the power market's main auction, which was held in December 2024, storage capacity of around 2.5 GW was contracted, indicating that this was a 44 percent increase over 2023, in which the total contracted for batteries was 1.7 GW. What is the largest battery energy storage facility in Poland?

With a power output of 262 MW and a storage capacity of around 981 MWh, the facility will be by far the largest battery energy storage facility in Poland and one of the largest in Europe. The contractor on the project will be LG Energy Solution Wrocław.

How many battery projects are being built in Poland?

The Polish Transmission System Operator Capacity Market auction has awarded a 17-year contract, indexed to inflation, for four battery projects to European Energy. The four projects have a combined capacity of 114 MW and are located in the north-western part of Poland. European Energy has 24 months to bring the projects to the ready-to-build stage.

Is Poland moving towards battery energy storage systems (BESS)?

As expected, Poland's latest capacity market auctions have highlighted a significant shift towards the battery energy storage systems (BESS) beside the fact that the de-rating factor has been significantly decreased.

Did European energy secure a contract for a battery project in Poland?

European Energy successfully secured a contract for several battery projects in Poland. The Polish Transmission System Operator Capacity Market auction has awarded a 17-year contract, indexed to inflation, for four battery projects to European Energy.

Will Poland lead Eastern Europe's battery storage market?

Poland is set to lead Eastern Europe's battery storage market, with 9GW

offered grid connections and 16GW in the capacity auctions.

What is the most advanced energy storage project in Poland?

The most advanced energy storage project in the PGE Group's portfolio is the Żarnowiec Energy Storage Facility. With a power output of 262 MW and a storage capacity of around 981 MWh, the facility will be by far the largest battery energy storage facility in Poland and one of the largest in Europe.
