

SolarMax Energy Systems

Polish lithium battery energy storage company

Overview

Where does Lyten manufacture lithium-sulfur batteries?

San Jose, CA & Luxembourg – July 1, 2025 – (BUSINESS WIRE) – Lyten, the supermaterial applications company and global leader in lithium-sulfur batteries, announced today the acquisition of Northvolt's Dwa ESS operations in Gdansk, Poland, a 25,000 square meter (270,000 sq ft) battery energy storage systems (BESS) manufacturing and R&D facility.

Where will LG Energy Solution supply lithium iron phosphate batteries?

It also noted that the project will be supplied with locally manufactured grid-scale lithium iron phosphate batteries at LG Energy Solution's production facility in Poland. LG Energy Solution will also be in charge of the project design and construction on a turnkey basis. Completion of construction is scheduled for 2027.

What makes Lyten lithium-sulfur batteries unique?

Lyten Lithium-Sulfur batteries have unique characteristics that make them ideally suited to meet rapidly growing demand for BESS: a broader operating temperature range especially in hot conditions, improved safety, and the ability to be made from abundantly available, low-cost materials found throughout the US and Europe.

Will Lyten's lithium-sulfur batteries be used for drones?

Lyten has previously announced its lithium-sulfur batteries are shipping commercially for drones, launching onto the International Space Station, and selected by Chrysler, a Stellantis company, for its Halcyon Concept Electric Vehicle.
