# Power station power generation renovation project

## Overview

---

Once a power company does decide that a new power plant or retrofit is necessary, it typically issues an RFP. That's when the rubber hits the road and EPCs get to work. Project success starts with a good proposal, so most EPCs have a formal process in place to work through the details. Companies must evaluate the.

A common mantra throughout the power industry is "Plan the work and work the plan." There's no place where that concept applies more than on construction and retrofit projects (Figure 1). Getting a team assembled quickly so a project can get off on the right foot is.

At the end of the day, all parties involved in a project want it to be successful (Figure 2). The contractors want to produce a quality product, while providing jobs for workers and a profit.
