

SolarMax Energy Systems

Price comparison of emergency energy storage vehicles in India

TAX FREE

Product Model

HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions

1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity

215KWH/115KWH

Battery Cooling Method

Air Cooled/Liquid Cooled

Overview

How much does battery-based energy storage cost in India?

Currently, the cost of battery-based energy storage in India is INR 10.18/kWh, as discovered in a SECI auction for 500 MW/1000 MWh BESS. The government has launched viability gap funding and Production-Linked Incentive (PLI) schemes to make battery storage affordable.

How battery energy storage system can help India meet peak demands?

Battery energy storage system based on low-cost lithium-ion batteries can enable India to meet the morning and evening peak demands. The Government of India (GoI) has set a target of achieving 175 GW of renewable power installed capacity by December 2022.

Are energy storage projects being built in India?

According to a report published by the Lawrence Berkeley National Laboratory (LBNL), a large number of energy storage projects are being built worldwide, and there is a significant interest among policymakers in India as well.

How much energy does India need for energy storage?

viable means for implementing energy storage solutions. The Central Electricity Authority's (CEA) latest optimal generation mix report indicates that India will need at least 41.7 gigawatt (GW)/208.3 gigawatt-hour (GWh).

How much does an ESS cost?

as potential energy in the water of the upper reservoir. An ESS is any technology solution designed to capture energy at a particular time, store it available to the offtaker for later use. Capital Cost Pumped storage plant costs can range from US\$1,700-2,500/kWh.

Are battery prices rising in India?

Indian battery prices are still slightly higher at USD 70–80/kWh. Battery costs constitute over 50 per cent of BESS capital expenditure. The report states that viability gap funding (VGF) of up to 40 per cent, capped at ₹2.7 million/MWh, continues to play a critical role in ensuring tariff sustainability.
